### US6076059A - Method for aligning text with audio signals ...

@ctzogka We are currently also working on forced alignment based on DeepSpeech, but this is pre-alpha and not tested on any other language than English. There is a quite comprehensive list of forced alignment tools. For your case the CMU Sphinx aligner seems to be a good first bet, as there is a Greek model. There is also an example on how to use it.

### Force alignment (synchronize audio with text) - DeepSpeech ...

Method 1: Align animation with the audio waveform. In this approach, you import the audio file into the Flash Timeline. Then, you use the waveform display in the Timeline to find where each word begins and ends. You then perform your animation (to reveal text, for example) in the frames that correspond to the appropriate word in the audio.

### Synchronizing text with audio - Adobe Inc.

A computerized method for aligning text segments (310) of a text file with audio segments (330) of an audio file, comprising the steps of: generating (301) a vocabulary and language model (320) from the text segment (310); recognizing (302) a word list (332) from the audio segment using the vocabulary and language model; aligning (303) the word list (332) with the text segment (310); choosing corresponding "anchors" (304), defined as the lines of separation between segments, in the word list ...
