Psychological therapy is meant to treat a mental health condition or help a child manage their symptoms so that they can function well at home, in school, and in their community. When children are young, it is common for therapy to include the parent. Sometimes therapists work with the parents alone.

therapeutically use play to help their clients, most often children ages three to 12 years, to better express themselves and resolve their problems. Play therapy works best when a safe relationship is created between the therapist and client, one in which the latter may freely and naturally express both what pleases and bothers them.
