develop a reliable, cost-effective molten salt steam generating subsystem for solar thermal plants, minimize uncertainty in capital, operating, and maintenance costs, and demonstrate the ability of molten salt to generate high-pressure, high ...

Molten salt steam generator subsystem research experiment ...

The Molten Salt Electric Experiment (MSEE) is a full-system demonstration of a solar central receiver power generation plant which uses molten nitrate salt as the primary heat transfer fluid and also as the thermal storage medium. The MSEE receiver has a thermal capacity of 5 MWt, and the turbine-generator is rated at 750 kWe.

for both practical and theoretical points. This chapter discusses the theoretical background and experimental methods to measure the electrical conductivity of molten salts.

Electrical Conductivity - an overview | ScienceDirect Topics

A common practice, generally accepted for conductivity measurements in molten salts, is an extrapolation of ohmic resistance of the melt to infinite frequency by fitting experimental results with equation of the form: $(1) R_m = R_{inf} + C f^{-1/2}$ where R_m is the ohmic resistance at frequency f , R_{inf} is the resistance at infinite frequency (with non-polarized electrodes), C is the constant ...

The liquid fluoride thorium reactor (LFTR; often pronounced lifter) is a type of molten salt reactor. LFTRs use the thorium fuel cycle with a fluoride-based, molten, liquid salt for fuel. In a typical design, the liquid is pumped between a critical core and an external heat exchanger where the heat is transferred to a nonradioactive secondary salt.

Liquid fluoride thorium reactor - Wikipedia

This work proposes a new solvent system composed of a molten salt in pressurized water, so-called hydrothermal molten salt (HyMoS). This system changes the paradigm of the solubility of inorganics in supercritical water. Using as an example NaOH, a low melting temperature salt, we show the possibility to precipitate it at a temperature above its melting one, leading to the instantaneous ...
